Office Action Summary	Application No. 10/662,423	Applicant(s) ITO ET AL.	
	Examiner David M. Fenstermacher	Art Unit 3682	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 16 September 2003.

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The IDS, filed 2/2/04, has been considered in full.

Oath/Declaration

3. The Oath/Declaration is acceptable.

Drawings

4. Figure 35 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The use of "Background Art" does not admit of it being prior to the date of invention.

Claim Objections

5. Claims 3 and 14 are objected to because of the following informalities: the use of "AC" appears to be –alternating current–. It should be spelled out in the claim.
- Appropriate correction is required.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-2, 4-13, 15-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Otani (5,568,842).

Otani shows the claimed invention where a lubrication system for an internal combustion engine (figure 1) where a oil passage (line near 1 reference number 1a) branch into multiple passages (to 30, 25, for example); the oil is supplied via passages (30) which passes the oil to the engine via passage (20), or returns it to the reservoir (43) (see the junction right below and slightly to the right of reference number (20)); the oil filter (8) filters oil and as in all oil filters has a bypass if the primary filter element gets clogged.

Claim Rejections - 35 USC § 103

Art Unit: 3682

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claims 3, and 14 rejected under 35 U.S.C. 103(a) as being unpatentable over Otani (5,568,842) in view of Jeske (5,825,109).

Otani shows the claimed invention except for the use of lubricating oil to cool an AC generator.

Jeske shows a vehicular oil cooled alternator (10) where oil is circulated in the alternator for cooling purposes (see Abstract).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Otani such that a portion of the oil was supplied to the alternator in view of the teaching of Jeske to increase the service life of the alternator (column 1, lines 56-60 of Jeske).

Conclusion

10. The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.
